DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 35-43, 52-53, 56-60, 63-70, 73, 79-81, 84-85, 95, 97, 98, 100-102, 108-114, 116-119, 121-123, 125-127, 122-140 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petruska et al USPN 5,755,750 in view of Terry 5,215,086 or 5,540,730. Petruska teaches a method of providing stimulation to a nerve (column 2 lines 10-20) wherein stimulation is applied with blocking applied as well along with a sensor feedback. Applicant differs as in reciting a programmer to apply the stimulation during non-contiguous times. Terry teach a method of applying unidirectional stimulation for treating ailments claimed by applicant wherein a sensor controls the application of the stimulation and the device is configured for intermittent circadian therapy. To have applied the Petruska technique to the Terry methods would have been obvious. Applicant's ailments treated by unidirectional are all well known techniques.
